10	~	~	24	24	24	24	24	24	24
12	~	~	~	~	30	30	30	30	30

Model UALSDV and UALSDVH are single (vertical) and double (vertical and horizontal) deflection spiral duct diffusers which are attached directly to the duct without the need for a saddle. These models eliminate the need for a specific part number for each size of spiral duct since each size offered covers a range of duct diameters as noted. Both Models have adjustable blades and are gasketed on the margin. An optional Air Scoop with face screw adjustment is available for either model. Extruded aluminum construction. Finishes are White and Clear Anodized.
